How To Tie The Mecate Knot

Step 1 Uncoil rope, lay flat on floor. Remove all twist.

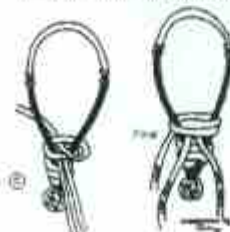

Step 2 Holding bosal with knot in the left hand and nosepiece to the right, insert knot end of rope down thru middle of "V" of bosal. See diagram 1

Step 3 Wrap the rope, above the knot end, around the bosal twice going from over the outside and around, pulling it snug. (Larger nosed horses may need only one wrap around the bosal.) See diagram 2 & 3.

Step 4 Make the reins by pulling the rope thru middle of bosal toward you and fit snugly in the "V". Rein length depends on the horse and the rider. See diagram 4

Step 5 Continue wrapping the free end of the rope around the bosal, above the reins going from over the inside and around once or twice as required for proper fit and placement on the nose. See diagram 5

Step 6 After wrapping, push free end of rope thru middle of bosal and under the top loop. Pull all ropes snug. See diagram 6
